# Tape Wound Measuring and Protection Current Transformers 

## MR Series Measuring Range

A comprehensive range of measuring ring current transformers for installation where reliability, accuracy and quality are required.

## Construction

High grade silicon iron cores are carefully selected, then insulated and protected by a polypropylene covering on which the secondary winding is toroidally wound by precision winding machines. Multi layers of polyester and PVC are then applied to provide a tough moisture resistant coating.

## Specifications

| System voltage: | 720 V maximum |
| :--- | :--- |
| Test voltage: | 3 kV for 1 minute |
| System frequency: | $50 / 60 \mathrm{~Hz}$ |
| Overload withstand: | $1.2 \times$ rated current continuously |
| Short circuit thermal <br> current (Ith) |  |
| Dynamic current (Idyn)*: | $60 \times$ rated primary current for 1 second |
| Service temperature: | $=2.55 \times$ Ith |
| Secondary current: | $-20^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ |
| Complies with: | 5 A or 1 A |
| Saturation coefficient: | IEC $60044-1, \mathrm{BSEN} 60044-1$ |
| Humidity: | $<6$ |
| Insulation class: | Up to $95 \%$ RH (non condensing) |
| Mounting hardware: | BSEN 60085 Class Y |

Loss in copper wires between instrument and CT for 5A secondary

| 6 | 0.06 | 0.12 | 0.24 | 0.36 | 0.48 | 0.60 |
| 10 | 0.04 | 0.07 | 0.14 | 0.21 | 0.29 | 0.36 |

## Features

- Available in a wide range of transformer ratings
- Accuracy up to Class 0.5
- Measuring or protective types

## Benefits

- Long product life

## Applications

- Switchgear
- Control panels
- Overload protection
- Control devices

## Dimensions

* Thermal current (Ith) \& dynamic current (Idyn).
Ith is the highest primary current (effective value), the Idyn is the highest primary current (peak value) that the CT can support for 1 second without damage, owing to excessive overloads with secondary short circuits.

## MR Series Measuring Range

MR transformers are used to accurately measure high alternating primary currents, converting the primary current into a proportional secondary current as required for measurement and instrumentation. They are available in 5 amp or 1 amp secondary versions.

| Part number | Ratio range | Class 3 | Class 1 | Class 0.5 | A | B | c | D | Approx. weight |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## PR Series Protection Range

IEC60044-1/BSEN60044-1 commonly define protection current transformers in terms of composite error at an accuracy limit factor. In simple terms this means how accurate the current transformer will remain when the primary current flowing is many times higher than in normal conditions i.e. in a fault situation.

The classification of protection current transformers follows the following simple formula:

Number after letter indicates factor of primary current up to which composite error will be achieved indicates composite error achieved in percentage terms

Manufacturers of protection devices will normally specify the classification for the protection current transformer intended to operate the particular protection device concerned.

In addition the classification of protection current transformers indicates accuracy class:
5P - current transformer will have a ratio error of $1 \%$ and phase error not exceeding 60 minutes.
1OP - current transformer will have a ratio error of 3\% (no level of phase error specified).

The PR series is a range of two of the most popular classifications of protection current transformers, 5P10 and 10P10. Other classifications are possible (such as 5P20 or 10P20). Please consult factory for a quotation should you require an alternative classification or a current transformer with dimensions different to those set out below.

| Part number | Ratio range | VA burden | Accuracy class | A | B | C | D | Approx. weight |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Consult factory for availability and lead time on 1A secondary for protection range.
1A current transformer dimensions may vary by up to $10 \%$.

## DB Series Current Transformers

A range of ring type current transformers with one metre flying leads, suitable for primary currents from 60-2500A with 5A secondaries. These cost effective current transformers offer a time saving and easy solution where installation of conventional foot/busbar mount is not practical due to space or location.

The long flying leads provide a consistent and versatile connection to any measuring/indicating equipment which can then easily be terminated wherever convenient.

## Specifications

| System voltage: | 0.72 kV |
| :--- | :--- |
| System frequency: | $50 / 60 \mathrm{~Hz}$ |
| Overload withstand: | 1.2 times rated current continuously |
| Insulation class: | $\mathrm{BSEN60085}$ Class Y |
| Operating temperature: | $20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |
| Humidity: | 5 to $95 \%$ relative humidity (non condensing) |
| Compliant with: | IEC60044-1, BSEN60044-1 |
| Accuracy: | Class 3 |
| Wiring length: | 1 metre |

## Features

- High quality comprehensive
- Accuracy class 3
- 1 metre flying leads

## Benefits

- Faster installation
- Less field connections
- Space saving solution
- Time saving solution (i.e. no screws to tighten)
- No vibration issues when fitted in alternator box
- Versatile with regard to fitting location
- Cost effective

## Applications

- Switch gear
- Distribution system
- Generator sets
- Control panels

## Split Core Current Transformers

## SC Series Split Core Current Transformers

A range of split core current transformers that offers a cost effective and efficient method by which the current can be measured without the need to break the conductor, thereby reducing installation and commissioning time.

## Specifications

| System voltage | $720 \mathrm{~V}(0.72 \mathrm{kV})$ maximum |
| :--- | :--- |
| Test voltage | 3 kV for 1 minute |
| System frequency | $50 / 60 \mathrm{~Hz}$ |
| Insulation class | E |
| Overload withstand | 1.2 times rated current continuously |
| Short circuit thermal | $100 \times$ rated primary for 1 second |
| Operating temperature | $-20^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$ |
| Relative humidity | $0-90 \%$ (non condensing) |
| Compliant with | IEC/EN $60044-1, \mathrm{BS} 7626$ |
| Accuracy | $\mathrm{Class} 3,1 \& 0.5$ |
| Mounting hardware | Plug-in metal feet for wall or base mounting |
| Rated dynamic current | $=2.55 \times$ Iht |
| Enclosure | Flame retardant grade classified UL 94V-O |

## Features

- High quality comprensive measurements
- Available in a wide range of transformer ratings
- Accuracy up to Class 0.5
- Foot or Busbar mounted

## Benefits

- Faster installation
- Cost effective
- Long product life

## Applications

- Switchgear
- Distribution systems
- Generator Sets
- Control panels

## 3-in-1 Current Transformers

## Features

- Cost effective three-phase moulded case
- Ratio's ranging from 60/5 to 630/5
- Integrated wire sealable terminal cover
- Busbar, DIN-rail and metal feet mounting hardware supplied
- Combined M4 posi/slot screw

## Benefits

- Isolated output for safety
- Faster installation
- Compact size
- Ex-stock delivery

## Applications

- Switchgear
- Distribution systems
- Generator sets
- Control panels

## 3-in-1 Current Transformers

A range of 3-in-1 current transformers combine three traditional current transformers in one moulded case. 3-in-1 current transformers can be directly installed next to a three-phase moulded case circuit breaker, thus saving installation time where fitting three standard individual current transformers would be required. The M3N1 range of current transformers offers primary currents between 60-630A with 5A secondaries with up to class 0.5 accuracy performance.

Specifications

| System voltage | 720 V maximum |
| :--- | :--- |
| Test voltage | 3 kV for 1 minute |
| System frequency | 50 Hz or 60 Hz |
| Primary ratings | 60 A to 630 A |
| Short circuit thermal current | $60 \times$ rated primary current (Ith): for 1 sec |
| Overload withstand | $1.2 \times$ rated current continuously |
| Rated dynamic current | $=2.55 \times$ Ith |
| Secondary terminals | M 4 screw terminals |
| Enclosure | Flame retardant grade classified UL 94 V -O |
| Aperture holes centres | $25,35,45 \mathrm{~mm}$ |
| Operating temperature | $-20^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Accuracy | $\mathrm{Class} 0.5,1,3$ |
| Mounting hardware | Plug-in metal feet for wall or base mounting |
| Compliant with | Busbar and DIN-rail mounting |

M3N1-25

M3N1-45

## Ebony Moulded Case Current Transformers

## Features

- CT ratios from 1A to 6000A with 5A and 1 A secondaries
- Accuracy up to Class 0.5
- Integral terminal cover
- High impact, flame retardant moulded case
- Busbar, DIN-rail or foot mounting options

## Benefits

- Wide range of apertures and case sizes
- Reduction of high currents for ease of metering
- Long product life

## Approvals

- BS EN 61010-1
- EN 60044-1
- UL Recognized file no: E257877

[^0]Ith is the highest primary current (effective value), the Idyn is the highest primary current (Peak Value) that the CT can support for 1 second without damage, owing to excessive overloads with secondary short circuits.

## Ebony Series Current Transformers

The range of Crompton Instruments Ebony current transformers offers wide system current ratings, apertures, busbar and case sizes to suit every application. Manufactured to meet EN 60044 the range benefits include ratio rating from $1 / 5$ to $6000 / 5$, accuracy up to class 0.5 , integral terminal cover for safety and multiple mounting options.

## Construction

The toroidal core and secondary winding is encapsulated by a self-extinguishing polycarbonate moulded case cover providing excellent mechanical strength and electrical insulation. The material is halogen free thus reducing risk of halogen emissions in case of fire. The integral covered secondary terminals offer protection to IP20B and the enclosure is protected to IP40.

## Installation options

- Plug-in metal feet for wall or base mounting
- Plastic DIN-rail clips for DIN-rail mounting
- Moulded busbar mounting
- Primary copper busbar mounting
- Multi busbar mounting for two busbars

## Specifications

| System voltage: | 720 V maximum |
